Gan Teng Siew Realty Sdn Bhd, an established company with more than half a century of rich history. The Company started with rubber business, with over thousands hectare of rubber estates, including in the state of Johor and Perak. As of today, these have been converted into oil palm plantation. In 1978, a small scale of 10 tonne per hour palm oil mill was born with the name of Ulu Kanchong Palm Oil Mill (UKPOM). The ambitious company did not cease to expand, hence in 1982; milling capacity was extended to 30 tonne per hour. In response to the company's needs and aspirations, milling throughput was further pushed up to 60 tonne per hour after the mill extension in 1995.

Over the past three decades, UKPOM has grown remarkably and now is one of the efficient commercial mills in Negeri Sembilan, serving hundreds of FFB small holders and few Estates in the surrounding area as well some FFB dealers. Those big agencies mill also seek help from our mill whenever they encounter backlog or mill breakdown, i.e. deliver all the backlogged FFB to us at ad hoc basis. Today, the company core business is CPO, PK and sales of FFB. In the view of expansion, the company is inviting talented people to join UKPOM set-up.

Why join us?

We constantly look forward to recruit talented people. Working with a team of experts, you will find opportunities to develop your professional career in a challenging environment that recognizes and rewards excellent performance.
