2.0 BACKGROUND OF COMMUNITY

➤ THE BASIC DEFINITION ABOUT “LEFT-BEHIND CHILDREN”

Under the Covid-19 epidemic left-behind children refer to minors under the age of 16 whose parents both go out to work or whose parents are incapable of guardianship. The group of left-behind children in China has attracted much attention. The issue of left- behind children in poor rural areas was socially neglected in China, as society and the government concentrated on epidemic prevention and control.

This situation has now become worse, as the parents of these children are finding it more difficult to return home because of the massive epidemic preparedness efforts.

➤ REVELANT DATA ABOUT LEFT-BEHIND CHILDREN IN CHINA

In China, a country with a large population, there are about 9.02 million rural left-behind children. (2016 survey statistics).

Since the end of March 2016, the Ministry of Civil Affairs, the Ministry of Education and the Ministry of Public Security have jointly launched a nationwide mapping exercise of children left behind in rural areas.

AIX1005 GROUP REPORT

As of now, the number of rural left-behind children under the age of 16 is 9.02 million. Among them, 8.05 million were under the guardianship of their grandparents, accounting for 89.3%; 300,000 were under the guardianship of relatives and friends, accounting for 3.3%; and 310,000, accounting for 3.4%, were left without guardianship by one party who was working outside the home.

There were 360,000 rural children left unsupervised, accounting for 4 percent. In terms of scope, 870,000 children were left behind in the eastern provinces, accounting for 9.65% of the national total; 4.63 million children were left behind in the central provinces, accounting for 51.33% of the national total; 3.52 million children were left behind in the western provinces, accounting for 39.02% of the national total. In terms of provinces, the number of children left behind in rural areas in Jiangxi, Sichuan, Guizhou, Anhui, Henan, Hunan and Hubei provinces are all above 700,000.

Due to the lack of parental care and normal family education, some of the left-behind children have some urgent problems in life, study, psychology and personal safety.

According to the survey results, left-behind children are usually withdrawn and confused to varying degrees. And

AIX1005 GROUP REPORT

left-behind children in rural area are a vulnerable group.

➤ THE BASIC SITUATION OF THE 14 LEFT-BEHIND CHILDREN WE HELPED

Therefore, the target audience for our project is selected to help 14 left-behind children at “QIZHI” school GUYONG TOWN, JIANGLE COUNTY, SANMING CITY, FUJIAN PROVINCE, CHINA.

✧ WITHOUT THE COMPANY OF THEIR PARENTS

The psychological problems faced by left-behind children are easily overlooked because the psychological problems of left-behind children without the company of their parents for a long time are the most worthy of attention.

The main psychological problems are loneliness, vulnerability, and lack of love. In this situation, many

AIX1005 GROUP REPORT

left-behind children are faced with a lonely and introverted personality, and some of them, although supervised by their grandparents or relatives, feel weak and helpless when faced with problems, unlike their parents.

Love and care play a vital role in a child's development. Most of the left-behind children are in a period of rapid physical and mental development, and they have understanding of their changes and interpersonal interactions. However, because the parents of left-behind children work all year round, some of them may not be able to call, write or meet their children for six months, a year, or even many years.

❖ SUFFERING “DOWN SYNDROME”

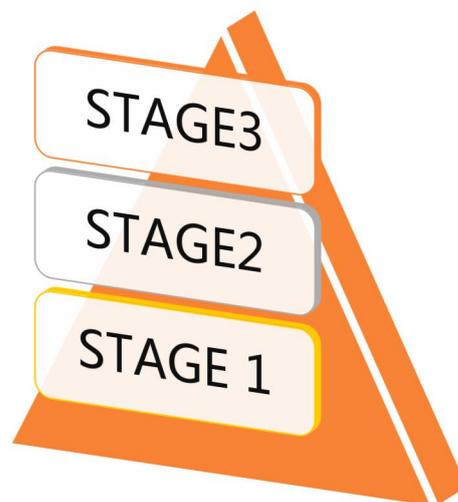

At the same time, 5 of the left-behind children in Qizhi kindergarten assisted by our project have Down syndrome. Down syndrome is a common chromosomal disorder that can have a very serious impact on children. Children with Down syndrome are prone to physical retardation, language development disorders, and special facial features. Therefore, we have firmly selected the group of left-behind children, and the attention of left-behind children cannot be missed.

3.0 OBJECTIVES OF OUR PROJECT

➤ THE OVERALL OBJECTIVE

As our entire project was divided into three phases, we set individual objectives for each of the three phases to ensure that the project progresses steadily. It was because we executed this part of our preparation well enough that we were able to execute our plan successfully and smoothly.

➤ THE SPECIFIC STATEMENT OF THE OBJECTIVES WE HAD ACHEVED IN THREE DIFFERENT STAGES

STAGE 1

- HAVE A PRELIMINARY UNDERSTANDING OF EACH OTHER WITH THE CHILDREN

In the first phase, we aimed to understand the basic conditions of the children in our target group, including their

AIX1005 GROUP REPORT

family background, growing experiences, psychological state, etc. Also, to listen to the difficulties they encountered in their lives, interpersonal relationships, and education as a disadvantaged group in society. In this way, we would be able to take better care of all aspects of these children during the one-to-one assistance that follows.

STAGE 2

- BUILDING **A LONG-TERM FRIEND RELATIONSHIP** WITH CHILDREN

In the second phase, we aimed to establish a good long-term relationship with the children's school, working with the teachers to receive and count the supplies and letters from our group members and visiting the children's homes with the teachers to hand-deliver the items that have come a long way, bringing comfort to the children's young hearts while improving their quality of life.

STAGE3

-TRYING TO ENCOURAGE MORE PEOPLE TO HELP OTHER REGIONS LEFT-BEHIND CHILDREN IN CHINA BY SPREADING VIDEOS

AIX1005 GROUP REPORT

In the third phase, we aimed to use our target group of left-behind children as a starting point to raise awareness of these disadvantaged groups through video campaigns, to make the public aware of the great difficulties faced by these children, and to encourage people in all regions of China to join us in helping the needy groups in society with the ultimate goal of eliminating public discrimination against the disadvantaged.

---------------	--	--	---

4.0 PROBLEMS FACED BY THE COMMUNITY

During the whole process of our project, we founded the 14 children we helped mainly faced 4 different problems as follow.

THE LACK OF LOVE AND CARE

MORE SENSITIVE IN PERSONALITY

DISABILITY

INCOMPATIBILITY WITH THE EXTERNAL ENVIRONMENT(INCLUDING THE SCHOOL)

➤ **THE LACK OF LOVE AND CARE**

During the pandemic because of the government's restrictions, the children's parents could hardly get home. Therefore, as young children who need parents' companionship, they lack love and care from parents. Besides , Unfortunately, two of the children's parents have passed away by accident, which makes it much more miserable for these two children's growth.

AIX1005 GROUP REPORT

➤ THE LACK OF SUPERVISION AND MANAGEMENT DURING THE LEARNING PROCESS

In terms of their learning, they lack supervision and management.

There are only two teachers in the kindergarten, which is far from enough for providing supervision. Also, their parents are far away, so they cannot be supervised by their parents. As a result, they cannot learn knowledge as well as their peers.

➤ DISABILITY

Among the group of left-behind children, 11 of them are born with disabilities, such as aphonia and natural speaking barrier. This is another difficulty for them to live a normal life and learn knowledge like their peers both physically and psychologically.

➤ INCOMPATIBILITY WITH THE EXTERNAL ENVIRONMENT

(INCLUDING THE SCHOOL ENVIRONMENT)

For the left-behind children we helped, the school is an important place for the left-behind children because the teachers could guide the left-behind children have complex

AIX1005 GROUP REPORT

personalities in school life, and different teaching styles of teachers will bring two different results in left-behind children(As follow)

✧ SITUATION1

If teachers can give correct guidance and indoctrination, positive encouragement and expectations to left-behind children for their emotional loneliness and lack of self-control, they can quickly change their attitudes and develop according to the expectations of teachers and parents.

✧ SITUATION2

If teachers are critical and critical and accusatory, or even forms some kind of stereotype that they are poor students and ignores them as long as they do not violate the rules, this will create a multifaceted shadow on these children psychologically.

AIX1005 GROUP REPORT

5.0 BRIEF EXPLANATION OF ACTIVITIES OUR GROUP DONE

During the whole process of our project, we met 14 cute and need careless children, they were both innocent and cute.

All activities we held for these 14 children as follow.

➤ ACTIVITY2-THE LITTLE DRIFT BOTTLE

✧ THE BASIC SITUATION OF ACTIVITY2

During the Covid-19, it is very important to take protective measures, so we has already sent masks and disinfectant by post, raise their awareness of protection.

We will organize an online charity fundraiser to all public to donate money and daily supplies (such as books、clothes), money and finally sent by YUHAN XIONG at last.

(THE ACTIVITY2 DATA SUMMARY TABLE)

➤ THE CHILDREN'S DAY THREE SPECIAL ACTIVITIES

FULFILL CHILDREN'S WISHES

MAKING DESSERTS TOGETHER

THE CHILDREN'S DAY PARTY

AIX1005 GROUP REPORT

✧ THE BASIC SITUATION OF CHILDREN'S DAY ACTIVITIES

On the children's day, we held three special activities for the 14 children we helped.

For the activity1-Fulfilled children's wishes.

A month before children's day, we distributed the "Children's Day" wish cards to the children. So that children could write down the Children's Day gifts they want on the cards, and then we did our best to fulfill them on the national children's day according to the children's wish list.

For the activity2-Making all kinds of desserts together. In the children's school, YUHAN and other volunteers divided the children into three groups to make different desserts with them, so that the children can experience the joy and pride of making desserts by their own hands.

AIX1005 GROUP REPORT

For the activity3-Held a children's day party. YUHAN and volunteers held a small Children's Day party for the children and performed a program with the children, the program included reading, dancing, singing and so on.

The children were very happy in this party, and dared to show themselves, so that their sensitive and fragile characters became gradually cheerful. They also met many friends at the par

ty.

6.0 PROBLEMS WE FACED DURING THE WHOLE PROCESS OF PROJECT

EACH MEMBER IN OUR GROUP IS IN DIFFERENT REGIONS IN CHINA

LIMITED ACTIVITY PROGRAM ISSUES

➤ PROBLEM1:THE WEEK3 ERROR TOPIC SELECTION

In week 3, when our group made the first topic selection, we made a wrong topic selection. There are three reasons why we made an error topic selection. (Three reasons as follow)

The problems we have

- 1) *REGION : There is no clear target for the region ✓*
- 2) *COMMUNITY: There is no clear target for the community ✓*
- 3) *The way to do group cooperation: There is no corresponding solution for group cooperation under the epidemic situation. ✓*

AIX1005 GROUP REPORT

And finally after the group discussion, we determined the correct project topic.

➤ PROBLEM2: EACH MEMBER IN OUR GROUP IS IN DIFFERENT REGIONS IN CHINA

The first one is that, since all the members of the international group are at home with internet classes, and all students are located in almost different locations and provinces, it is difficult to get everyone together face to face or to finish the group project at the same time.

Also, due to China's embargo on Covid-2019, many students had problems sending gifts to children in need during our first event. This also led to more problems in collecting gifts in a unified manner, such as the need to register each courier's information one-on-one, confirming whether there are any missing pieces, etc.; some people were also delayed in confirming information due to courier delays. Especially, there are three members in our group who are in Malaysia, because of the deadline for express delivery, they can't communicate with other members. Participate in two of our child-friendly activities (letter writing and mailing).

Our group's solution to this problem after group

AIX1005 GROUP REPORT

brainstorming is: they will be responsible for the registration of our group's financial public expenditures.

➤ PROBLEM3: Limited activity program issues

For our group, we had many new and interesting ideas when we first brainstormed, such as going on a field trip with the left-behind children, or taking them to a memorable museum, or even accompanying them to play games and do activities in the playground to answer their curiosity about foreign life.

However, since the group members could not get together to participate in this activity, we had to choose the second best activity that could help the left-behind children through the Internet or mail.

➤ THE DETAILED RECORD FORM AS FOLLOW

DETAILED RECORD				
SERIAL NUMBER	DATE	PROBLEMS SORT	FAULT/PROBLEM	SOLVE?
1	4.20th	TOPIC SELECTION	Error in topic selection at project start	√
2	4.24th	REGIONAL RESTRICTION	Three group members are in Malaysia now and cannot participate in both activities	√

7.0 SIGNIFICANCE OF FINDINGS

➤ THE FINDINGS OF OUR PROJECT

There are some terrible things that children could take in their lives, whether they are the environment, educational facilities or their relationship with their parents.

Our team did our best to give them our love through the warm letters and a few small gifts (extracurricular books, stationery, etc.) with the children, and children shows great enthusiasm to this, more urgent hope that children get concern and care, and this activity, not only promote the team members with the children's feelings, also has brought the children to the dreams of the future.

During the implementation of our project, the children became more and more sunny, lively and cheerful, and more and more willing to communicate with outsiders and open their hearts.

Therefore, under the epidemic situation, our two activities can bring warmth to the children in need of care. So we need to continue these two activities, do not do this because of the mission, but from the heart to care for the people in need

AIX1005 GROUP REPORT

➤ SIGNIFIANCE OF OUR FINDINGS

On the one hand, there is a certain gap between the rural environment where the left behind children live and the more developed urban environment in terms of infrastructure construction. Bookstores and libraries, which are readily available in some cities, are not established in rural areas. In some rural areas, express delivery, which is very convenient in the city, is also inconvenient. In this project, we send gifts and letters to left behind children to give them some material help and some spiritual care.

On the other hand, most of the children left behind in rural areas are taken care of by their grandparents and there are many disadvantages of intergenerational care, such as intergenerational spoiling and inadequate intergenerational education. The lack of parental supervision, companionship and assistance for left-behind children from a young age also has a great impact on their character and psychology.

In our project, we communicate with the left-behind children as "older sisters' and 'older brothers", so that we can understand their hearts more deeply and give them targeted help. For example, the attention and care given to them during chats

AIX1005 GROUP REPORT

can reduce the lack of love and make them cheerful. At the same time, we can also give them advice on their growth process so that they can better integrate into society and different groups in the future.

Every child longs for companionship. It is particularly important to focus on the spiritual aspect of each child left behind, which is also a prominent social issue. With the development of society, the problems of material life such as clothing, food, housing and transport that may be concentrated on left-behind children will be reduced; the rise of mobile internet has also increased the opportunities for left-behind children to meet their parents face to face to a certain extent, narrowing the distance between them.

However, some emotional problems such as psychological isolation and family desires still exist, and people also need to do their best to give left-behind children some life help or psychological help.

8.0 FINANCIAL REPORT

There are totally two parts of our group financial expenditure. The first one is public expenditure and the second one is personal expenditure.

PUBLIC EXPENDITURE

- DATA ADMINISTRATOR
 - MALE MEMBER 'S DATA-YINING XU
 - FEMALE MEMBER' S DATA-QIFEI WANG

PERSONAL EXPENDITURE

- GROUP DATA ADMINISTRATOR- WENZHE MA

➤ PUBLIC EXPENDITURE

For public financial expenditure on 17 May, YUHAN XIONG as a representative bought 14 present package bag which costed 4.2 yuan each and totaled up to 58.8 yuan through an online shopping platform of China (JD.com).

Our group member were used as a gift bags for the gifts the group members sent to the children.

AIX1005 GROUP REPORT

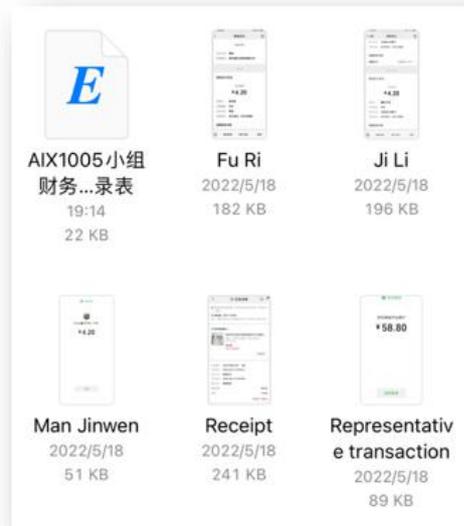

It was paid by YUHAN XIONG through online payment and then each member transacted 4.2 yuan for each gifts bags bag to YUHAN XIONG also through online payment.

Both of each member's transaction record to the representative and the representative's payment records as follow.

9.0 CONTINUITY PROJECT

CONDUCTING OUR GROUP FIELD ACTIVITIES TOGETHER

ENCOURAGING MORE PEOPLE TO JOIN US BY THE VIDEO SPREADING

TRYING TO HELP MORE COMMUNITIES IN THE FUTURE

➤ CONDUCTING OUR GROUP FIELD ACTIVITIES TOGETHER

If the epidemic situation in various parts of China improves in the future, our group members can try to hold activities together at the school of 16 children, and read the letters we once wrote to each other with their matched children.

➤ ENCOURAGING MORE PEOPLE TO JOIN US BY THE VIDEO SPREADING

There are still many children in need in various regions of China under the epidemic, and the strength of our 16 members is limited.

AIX1005 GROUP REPORT

Therefore, we are ready to let more people see the videos of our project on major media platforms (WECHAT\TENCENT NEWS), and then encourage more people in every corner of our society to join us , and help left-behind children who need help in each areas of China together.

➤ TRYING TO HELP MORE COMMUNITIES IN THE FUTURE

Under the epidemic, not only left-behind children need help, but also many groups need the care of society, such as the disabled, the elderly living alone, vulnerable groups in need and so on.

Therefore, we plan to help more communities in future. We plan to try to give full play to the advantages of each member of our group in various regions of China, and let each member encourage local people to carry out public welfare activities in the area where they live.

10.0 PROJECT SUMMARY AND CONCLUSION

➤ OVERALL SUMMARY

Our international group projects have been running nearly 3 months from April 1st to June 23rd.

In these three months, our team members helped each other, united cooperation. Although our team members are distributed in various regions of China, but we still could work together to solve each difficulties, and let the project perfectly executed and ended successfully.

➤ “LOVING MOM.RED APRON”

In the past few months, we also met a caring volunteer team who is constantly dedicating themselves to the society-“LOVING MOM.RED APRON”.

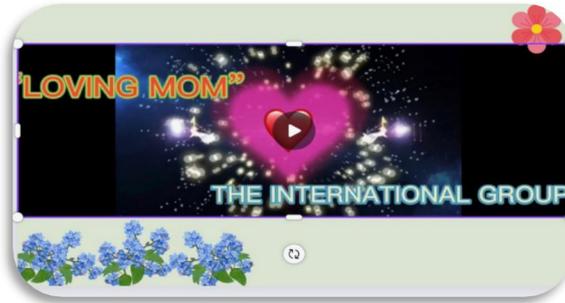

The “Loving Mom” volunteer team helped us

organize offline activities together in our project, providing a huge platform for the development of our group's activities.

We worked with them to solve problems and did the brainstorm together to organize various activities for children, bringing warmth and strength to children who we helped.

➤ THE SOCIAL MEANING OF OUR PROJECT

We plan encourage more people to help anyone who need help by making video to record our project , and put our videos in media platforms(such as TENCENT NEWS\WECHAT)

➤ THE FUTURE WISHES OF OUR GROUP

This project means a lot to everyone in our group, it gave us the joy of helping others, it taught us how to work together, and it taught us how to be better.

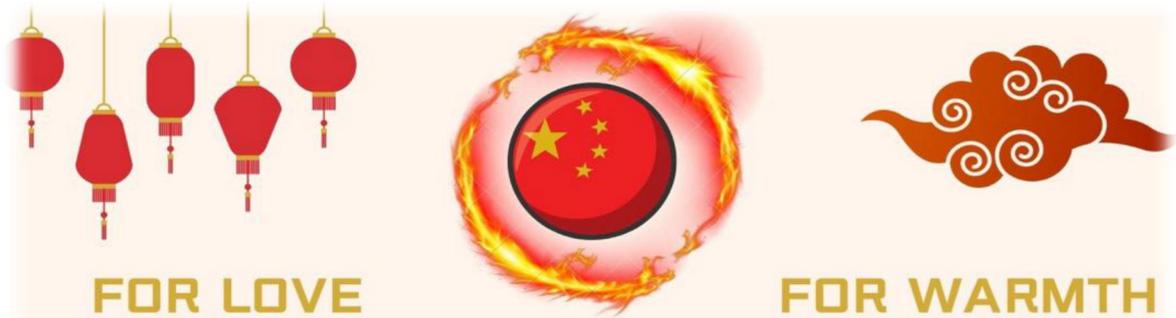

In this world, it's not just these 14 children who need help, there are many people in need and people we can help. It's not just the 16 members in our group, if everyone in this world can give a little love, our world will really be different, it will be a beautiful world.

So, we want to say: Please take action to help those in need as much as possible in your daily life.

Our love knows no race, borders, or location.

Take action with us to give our world the love you could give.
